**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of Group II (claims 8-15) in the reply filed on February 4, 2005 is acknowledged.

***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

**In the Title:**

Please amend the title as follows: --METHOD OF FABRICATING A MOSFET  
HAVING A RECESSED CHANNEL--.

**In the Claims:**

Please cancel claims 1-7 and 16.

***Allowable Subject Matter***

Claims 8-15 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record fairly shows or suggests all the process limitations as claimed.

Art Unit: 2822

Specifically, regarding claim 8, none of the prior art of record discloses the following limitations in combination with other limitations: *sequentially forming a gate conductive layer and a capping layer on the gate oxide layer so as to completely fill the recessed trench; forming a gate electrode that is overlapped by the gate conductive layer filling the recessed trench by patterning the capping layer and the gate conductive layer which rises over the semiconductor substrate to have a smaller critical dimension than that of the recessed trench; and forming a source/drain region by implanting impurity ions into the semiconductor substrate on both sides of the gate electrode.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following U.S. Patents disclose relevant teachings regarding MOSFETs having recessed channels: Hummler '213, Bryant '517, Durcan et al. '732 and Hummler '558.
